

GNIESLAW, Simon

- Please choose your own preferences

⚠ IMPORTANT

- **Number every box** from 1 to 6 in order of your preference for your vote to count.
- Please choose the candidate you think is the best choice as your number 1.
- If your number 1 choice doesn't win, then your vote is fully transferred to the next preference until there is a winner, so there is no risk in voting for someone who you think won't win.

If you think want to show your support, a number 1 preference would be most greatly appreciated and will make a bigger impact than being further down the list. Number 1 preferences have a better chance in the count, reflects better in the stats, and has a better chance of getting the deposit back.

Policies that I support:

- **Addressing the Climate and Ecological Emergency**
 - Must be economically sensible
 - Rapid Investment in renewables & battery, not gas/coal. We should have a surplus of energy to unlock capabilities - 800% renewables in 10 years target.
 - Rapid investment in manufacturing and research & development.
 - No power shortages or price spikes – Switch off only when renewables take over.
 - Logging must immediately stop
 - Building materials made from recycled plastics.
 - Agroforestry to plant more trees for harvesting.
 - Protect native species like the critically endangered Leadbeater's Possum which is Victoria's state emblem, and many others.
- **Good Governance**
 - Community Consultation
 - **Everything (including my other policies) must be properly consulted with the community in a meaningful way.**
 - I will run my own consultations to get community feedback and vote, on all issues.
 - No more surprise speed limit changes, or extended over-the-top lockdowns etc. without broad community support.
 - Balance of Power
 - a Crossbench will keep the major two parties on their toes to do the right thing.
 - Integrity and Transparency
 - Both major parties have corruption inquiries lingering and are constantly in hot water.
 - Local Advocate
 - Please come to me whether I win or not, I will always want to support you on any issues which need addressing in the community.
- **Protected Bike Paths**
 - Current bike lanes are dangerous, making them impractical to use, Bikes, Cars and Pedestrians need to be completely separate from each other.
 - Electric Bikes (eBikes) are a great alternative option to driving, they are good for health, environment, and cheaper than a car.
 - Driving cars will always have a place in the mix. We also need EV Chargers statewide for long distance journeys. Bike Lanes will reduce car traffic and infrastructure needs.
 - Safe Bike Paths need to be rolled out across the entire city, connecting schools, shops public transport and workplaces, and homes. Great for getting to/from the station without needing to get there early for a car park.

Remember to number every box to make your vote count!

I am also a member of the Fusion Party (www.fusionparty.org.au), which is not a Registered Political Party in Victoria. They do great work, but this campaign is of my own however.
