DON'T WASTE YOUR #1 VOTE ON THE USUAL SUSPECTS!

- Protect Prahran's local environment, heritage and liveability
- Action on climate change
- Return real planning powers to local communities
- Deliver new community infrastructure before more housing
- Better public transport
- **Ease the cost-of-living crisis AND solve the housing crisis** - this can be done by investing in public housing and by the federal government reducing hyper-demand for housing (i.e. phase out property investor tax concessions, lower immigration and population growth, and ban foreign investment)

Sustainable Australia Party is an **independent community movement** with a **science and evidence-based** policy platform. We are the *only* political party to **put our environment first** - and therefore our health, economy and quality of life. **Visit: sustainableaustralia.org.au**
